

## LS151 Primer Resurfacing Primer

Cureflex LS-151 Resurfacing Primer is a new generation of high adhesion primer solutions specifically engineered to radically improve non porous surfaces and substrates such as:

### Metals

Stainless steel, brass, copper, galvanised iron and zincalume

### Polished

Porcelain, stone tiles and panels, solid timber boards and panels sealed or lacquered

### Glazed

High gloss ceramic tiles, glass bench tops, glass splash backs, sealed surfaces

### Extremely dense surfaces

General non-porous and shiny surfaces, PVC and ABS Plastics, vinyl, paint, laminex, epoxy and polyurethane finishes, waterproof membranes

Cureflex LS-151 Resurfacing Primer provides a high strength film over non-porous surfaces creating an excellent new surface that allows tiling, rendering, and other construction materials to adhere to without the aid of expensive, hazardous epoxy/polyurethane adhesives. It provides a quick and cost effective solution.

### Features

- Solvent free
- Non-flammable
- High water resistance
- Fast drying (15-30 mins)
- Free of hazardous odours
- One-part hassle free application
- Available in 1.2L – 5L – 15L drums
- 1L/10-12m<sup>2</sup> approximate coverage
- No grinding or etching surfaces required
- Creates new surface for stable adhesion performance

Cureflex LS-151 Resurfacing Primer has been field and laboratory tested to ensure it satisfies and exceeds industry requirements.

*Cureflex LS-151 Resurfacing Primer can be applied using brush or roller over clean surfaces.*

Australian Made, designed and protected.
